Experience

June 2016 - May 2017 @ Wijs in Ghent, Belgium.

Among my tasks:

- Implementing the website design in CMS (based on Symfony framework).
- Developing and implementing the JavaScript plug-ins/modules according to the designers needs. Mostly with jQuery.
- Device testing and troubleshooting.
- During my time at wijs I developed some Adobe Photoshop scripts in order to automate banner production.

Oct 2009 - Oct 2015 @ Atrium Glaskunst in De Pinte, Belgium.

In 2009 I moved to Belgium. I started studying (first the language -Dutch, I mean-, and then Programming) meanwhile I worked part time as an apprentice stained glass restorator.

Sep 2005 - Jul 2009 @ Tendencias & ADN Latam in Asunción, Paraguay.

In Paraguay I was working in market research. As a Production Manager, my main tasks were data processing (SPSS), graphic design for the presentations (Powerpoint) and I was managing the survey teams.

< 2005

I worked as a graphic designer for a production company (mainly, I designed posters, flyers and flash-webpages for cultural events). Before that I was an employee in a Cybercafe, where I was responsible for client service and the configuration and maintenance of the equipment.
